SKILLS

- Project Management
- Research Skills
- Web Design
- Problem Solving
- Code Generation
- Time Management

LANGUAGES

- Arabic (Fluent)
- English (Fluent)
- French (Intermediate)

INTERESTS

- Cybersecurity Analyst
- Software Development
- Project Management

PROFILE

A Cybersecurity graduate at the University of Wollongong in Dubai, specializing in network security, threat analysis, and security hardening. Passionate about identifying vulnerabilities, strengthening system defenses, and securing enterprise environments. Currently seeking internship or full-time opportunities as a Cybersecurity Analyst. Pursuing a Master's in Applied Cybersecurity at UOWD with a focus on advanced security analysis and network defense.

PROJECTS

May 2025 - December 2025

AI Digital Humans – Graduation Project (Collaboration with PwC M.E)

- Worked with PwC Middle East's AI digital human platform to develop intelligent, interactive avatar features.
- Implemented gesture detection for more natural and responsive digital human interactions.
- Added GPS, Maps, weather, and itinerary modules to support contextual, location-aware assistance.
- This project won the 3rd place in the Innovation Fair of Computer Science

October 2025 - November 2025

SkyLink Aviation Systems (SLAS) – Network Security Project

- Designed and deployed a secure enterprise wireless network for a simulated aviation company using WPA2-Enterprise and AAA/RADIUS authentication.
- Configured VLAN-segmented wireless access (VLAN 20) with a dedicated RADIUS server, DHCP services, and strong authentication secrets.
- Set up and validated secure client connectivity through WPA2-Enterprise profiles to restrict access to authorized personnel.
- Performed network hardening and validation tests, ensuring correct routing, successful authentication, and alignment with aviation-grade security requirements.

March 2025

Human Computer Interaction - CrimeTrack Application

- Designed and developed a law enforcement coordination app.
- Enhanced real-time communication and emergency response.
- Integrated crime alerts, GPS navigation, live tracking, and secure messaging.
- Improved collaboration between officers and command centers for faster response.

EDUCATION

University of Wollongong in Dubai

Master's of Applied Cybersecurity

Jan 2026 - Present

Bachelors of Computer Science | Cybersecurity

Sept 2022- Dec 2025

CERTIFICATIONS

- Foundations of Cybersecurity - Google
- Code Generation and Optimization Using IBM Granite - IBM
- Getting Started with Threat Intelligence and Hunting - IBM
